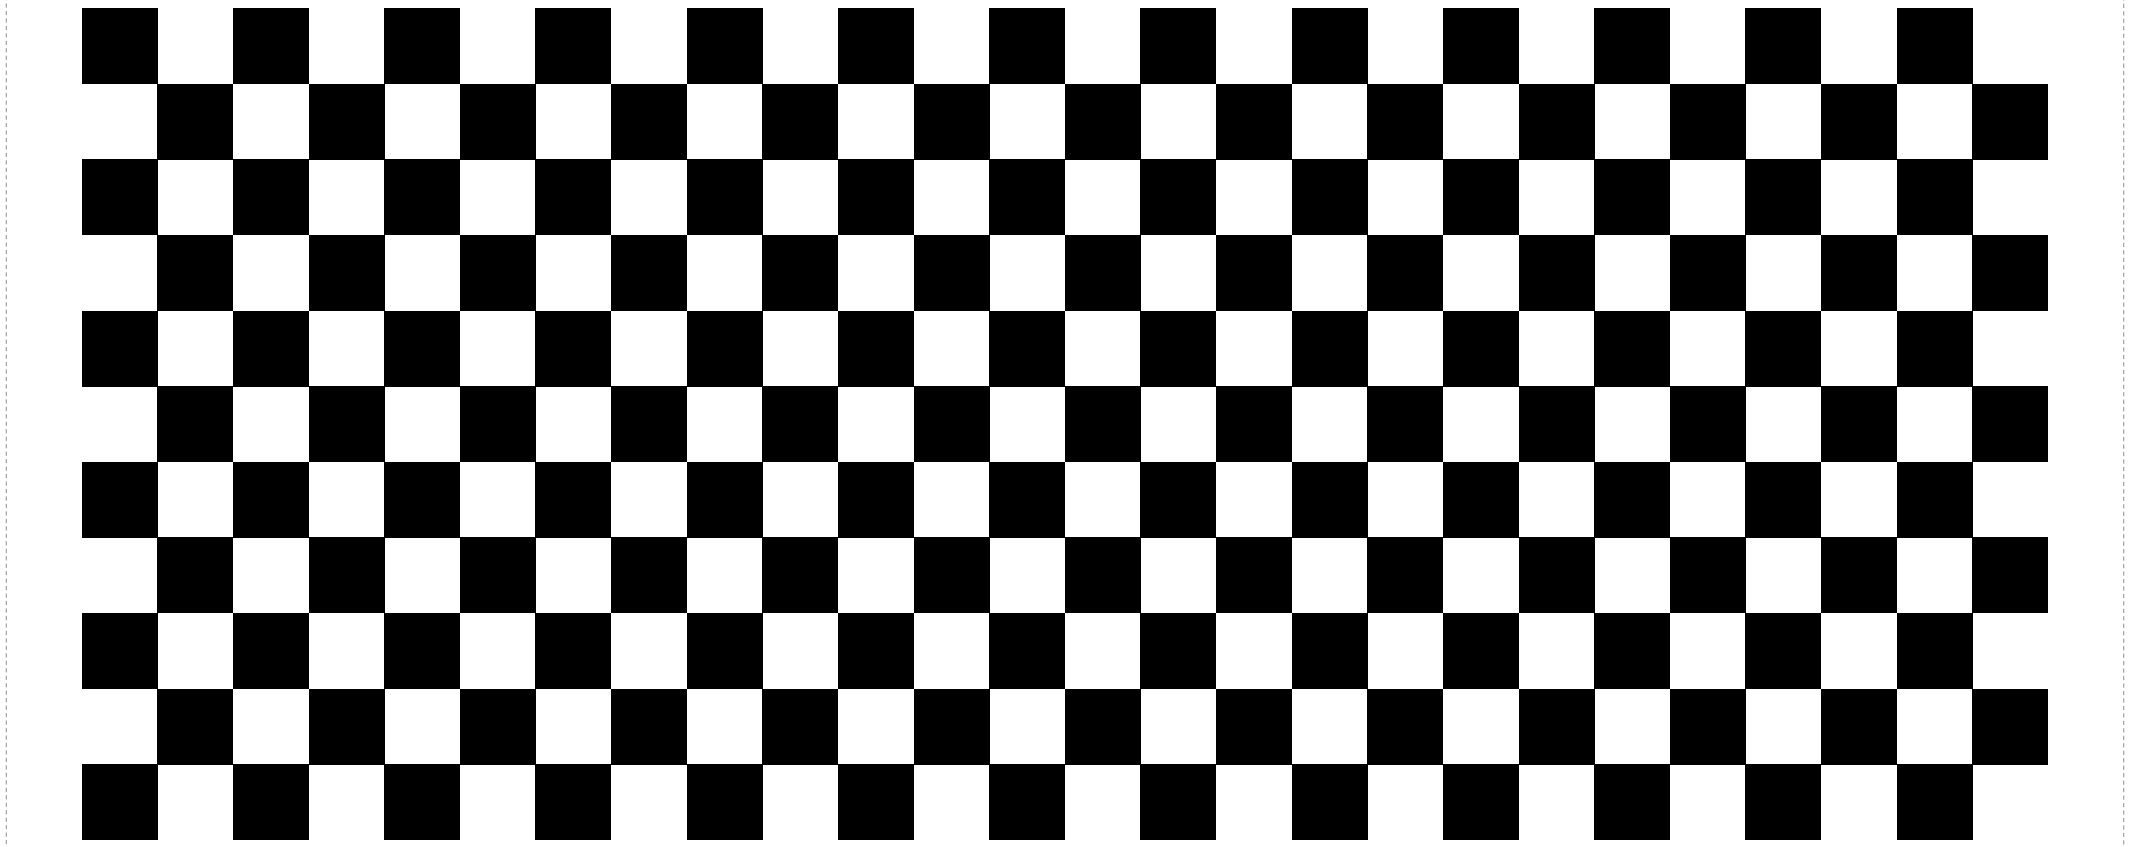
press2sim calibration board

Print at 100% (actual size, no fit-to-page). The checker area must measure 260 × 110 mm: 26 × 11 squares of 10 mm.

Cut along the dashed line, glue to card, and stand it flat against the dotted face with its bottom edge on the table.



100 mm: check this with a ruler. If the checker area printed at another size,
set board.printed_width_mm / printed_height_mm (see config.example.json).
